36 years
British citizen
BSc. in Economics
University of East Anglia, UK

Self-taught aspiring full-stack developer with 18+ months of full-time study, focused on building dynamic applications using *React, Next.js, and MongoDB*. I have strong problem-solving skills, a passion for continuous learning, and a background in team leadership and technical support.

Work Experience

§ 2018 - 2023 | BigByte Education - Taipei, Taiwan

Learning Management System Administrator

- Administered the Canvas LMS for 500-700 users, focusing on data consistency and enhancing user experience
- Oversaw user accounts, permissions, and content updates with a focus on reliability and consistency.
- Improved UX for parents and students by creating dynamic accessible homepages summarizing weekly content.
- Provided daily technical support and training to all employees, students, and parents.
- Led a team of four members delivering a full curriculum update to a CCSS curriculum over three years.
- Created core curriculum assessments. This involved managing online material, designing material for print, proofreading, and version control through regular updates.

Headteacher

- Managed and trained four full-time employees at a private education branch each year, specialized in teaching supplementary English lessons.
- Created a welcoming and engaging environment by proactively identifying student needs and implementing targeted strategies.
- Managed three different branches over, each year assigned to the branch that represented the biggest challenge for the company.
- Maintained 85%+ student retention through strategic leadership and targeted interventions.
- Interviewed and recruited employees over three years resulting in seven successful hires and four employees staying over two years.

§ AGI Language Institute - Seoul, South Korea
